CIRCULAR

Dear Students,

Warm Greetings from Department of Computer Science & Engineering, S.R.K.R. Engineering College (Autonomous), China Amiram, Bhimavaram-534204, Andhra Pradesh, India.

It is our great pleasure to inform you that a One-day SEMINAR on "**Problem Solving and Design Thinking**" is being organised by the Department of Computer Science & Engineering on 16th and 17th of the December,2020 at S.R.K.R. Engineering College, Bhimavaram.

Contents to be covered:

| Date | Session 1 (10:00 AM to 12:00 PM) | Session 2 (2:00 PM to 5:00 PM) |
|------------|---|---|
| 16-12-2020 | Design thinking: critical value through problem solving | A design thinking approach to problem solving |
| 17-12-2020 | Ethics in design thinking | Principles of design thinking |

ANNEXURE-I

Problem solving and Design thinking helps the students to learn how to solve the problems in a simple way. This workshop helps how to think critically about the problems to give an optimal solution. Students learn the ethics and various steps involving in the critical thinking process. This workshop helps the students how problem solving and critical thinking are couples to each other. With this work workshop student learn to do the projects and becomes industry ready.

About Problem Solving and Critical Thinking:

Design thinking is a process by which designers approach problem solving. It incorporates analytical, synthetic, divergent and convergent thinking to create a wide number of potential solutions and then narrow these down to a "best fit" solution.

Design thinking is an iterative process in which you seek to understand your users, challenge assumptions, redefine problems and create innovative solutions which you can prototype and test. The overall goal is to identifyalternative strategies and solutions that are not instantly apparent with your initial level of understanding. Thus, design thinking provides a solution-based approach to solving problems which helps you do so in a creative and collaborative way. Design thinking is more than just a process; it opens up an entirely new way to think, and it offers a collection of hands-on methods to help you apply this new mindset.

In essence, design thinking:

- ✓ Revolves around a deep interest to understand the people for whom we design products and services.
- ✓ Helps us observe and develop empathy with the target users.
- ✓ Enhances our ability to question: in design thinking you question the problem, the assumptions and the implications.
- ✓ Proves extremely useful when you tackle problems that are ill-defined or unknown.
- ✓ Involves ongoing experimentation through sketches, prototypes, testing and trials of new concepts and ideas.
