Feedback Analysis 2023-24

A feedback on the curriculum is obtained from students, faculty, parents and alumni. After study of the feedback form various stake holders some important points of the feedback are identified. Total 185 feedback forms have been obtained from various stake holders.

The following are the key points obtained from the study of the feedback:

1. All round development of the interpersonal and communicational skills to be encouraged
2. Students should be trained to explore and understand emerging technologies
3. Students need a course/Lab on MATLAB
4. Students should have more hands-on experience to connect theory with practice.
5. According to the competence outside we can increase the depth of the syllabus. It may overload the students but increases the standards.
6. Need more focus on quality than quantity.
7. Internships are to be included in syllabus.
8. Can add python language in first year
9. Introduce software courses in every semester
10. Include industrial tours in the curriculum.
11. Put more programming courses as elective subjects.
12. Include new technologies in the syllabus
13. Library stock should be increased.
