		SAGI RAMA KRISHNAM RAJU ENGINEERING COLLEGE (A)			R23
		I B.Tech. I Semester MODEL QUESTION PAPER			
		COMMUNICATIVE ENGLISH			
		Common to all Programmes of Engineering			
Γim	ne: 3 F	Irs. N	Iax. M	Iarks:	<b>70</b> N
		Answer Question No.1 compulsorily			
		Answer ONE Question from EACH UNIT			
		Assume suitable data if necessary			
			10 x 2	= 20 N	Iark
			CO	KL	M
1.	a).	Construct any four expressions used for invitations.	1	3	2
		Build a short conversation on "Importance of learning a foreign	1	3	2
	<b>b</b> ).	language".			
		Choose the suitable transition/discourse markers:	2	3	2
		i I fired at the leopard; he shook my arm.			
		a) as b) since c) because d) for			
	<b>c</b> ).	ii. The flood victims are short of food they urgently			
		need medical supplies.			
		a) Similarly b) In addition c) Any how d) For instance			
	-1)	Construct a sentence for each of the following words.	2	3	2
	<b>d</b> ).	i. Flutter ii. Obsolete			
		Choose the appropriate articles to fill-in the blanks:	3	3	2
	<b>e</b> ).	i. Srikanth is planning to go to United States of America.			
		ii. John built yard for his cattle.			
		Construct the sentences with appropriate prepositions:	3	3	2
	<b>f</b> ).	i. Shivaji Maharaj fought every kind of aggression.			
		ii. How did these things come?			
		Construct the following chunks into meaningful sentences.	4	3	2
	<b>g</b> ).	i. The platform is on the train.			
		ii. To college walk I every day.	_		_
		Organize the given sentences into a meaningful paragraph:	4	3	2
		i. The foundation stone was laid in 1972.			
		ii. As a result, the city suffered from horrendous traffic congestion.			
	<b>h</b> ).	iii. It was going to be the first in South Asia.			
		iv. They plied in the center of the road.			
		v. To ease traffic in the city, it was decided that an underground			
		railway line would be built.			
	1	vi. Calcutta, unlike other cities, keeps its trams.			

	Construct a short note (50 words) on Scanning technique.	5	3	2
j).	Develop four relevant sentences for the following pictorial representation.  FOUR ESSENTIAL ELEMENTS  COMPLETENCES  COMPLETENCES	5	3	2
				Iarks
	UNIT-1	CO	KL	M
a).	Identify the different ways in which O. Henry tells his readers about the financial situation of the couple "Mr Jim and Mrs Della".	1	3	5
b).	Develop a conversation for the following context.  Sasi introduces her friend A K Narayana, who has been admitted to the first year B. Tech Class, to her English Professor Dr. Rajeev Prakasam.  OR	1	3	5
a).	Develop the theme "Self-help is the best help" through a story of your own.	1	3	5
	Make use of appropriate expressions to fill in the blanks.	1	3	5

		UNIT-2			
4.	a).	Construct an essay on the lines 'For men may come and men may go, / But I go on forever' in the poem 'The Brook'.	2	3	5
	b).	Make a list of any five Cohesive Devices and use them in your own sentences.	2	3	5
		OR			
5.	a).	Construct a Paragraph on any one of the following in 100 words.  i. "Practice makes man perfect". ii.NEP-2020	2	3	5
	b).	Distinguish the following pairs and use them in sentences.  i.aisle/isle ii. Four/fore iii.paws/pause iv. Sell/cell v. reign/rain	2	3	5
		UNIT-3			
				4	-
6.	a).	Examine the life of Elon Musk to prove that he is a visionary leader of cutting-edge technology. Discuss with relevant examples.	3	4	5
	<b>b</b> ).	<ul> <li>Examine the errors and construct correct counterparts.</li> <li>i. Many peoples attended the funeral of the great man.</li> <li>ii. The shepherd took the cattles to the field.</li> <li>iii. Sita could not understands what the teacher was saying.</li> <li>iv. Do you know the importance for clean water?</li> <li>v. Laugh is the best medicines.</li> </ul>	3	4	5
		OR			
7.	a).	Assume appropriate verb forms to fill in the following blanks.  i. Were you (pay) attention to what was being said?  ii. Raman (live) in Chennai for 10 years.  iii. Suraj (love) going to the parties with his friends.  iv. Neither of my brothers (have) any children.  v. Nobody (be) allowed to drive unless they are eighteen.	3	4	5
	b).	Examine the errors and construct correct counterparts.  i. You can take Visakha Express to Mumbai.  ii. There are a pair of trousers.  iii. The committee has voted as per their choice.  iv. The clothes were neatly hanged on the cloth line.  v. The film show began when we arrived in the hall.	3	4	5
		UNIT-4			
8.	a).	Infer the way by which the children found it exciting to play with their new non-violent toys.	4	4	5
	b).	Analyse your requirement of transfer certificate as undergraduate for applying for a postgraduate course in a letter to your Principal.	4	4	5
		OR			

9.	a).	Assume relevant credentials and build a CV for the following position	4	4	5
'•	u <i>j</i> •	mentioned.	<b>−r</b>	<b>-r</b>	J
		You are a fresh graduate in Computer Science Engineering from the			
		National Institute of Technology, Trichy. You found an advertisement			
		in the Hindu that Infosys hires Web Developers.			
	<b>b</b> ).	As a recent buyer of the car, assume relevant information and draft an	4	4	5
		E-mail to the Manager of XYZ automotive company, Mr. Kishore,			
		regarding the poor quality of service facility available in the city. Sign			
		the E-mail as Anil.			
		UNIT-5			
10.	a).	Analyze the ways in which you can incorporate intrapersonal	5	4	5
		communication in your own life.			
	<b>b</b> ).	Analyze the following passage carefully and write an answer to the	5	4	5
		questions given in the following.			
		Caffeine, the stimulant in coffee, has been called "the most widely used			
		psychoactive substance on Earth". Synder, Daly and Bruns have			
		recently proposed that caffeine affects behavior by countering the			
		activity in the human brain of a naturally occurring chemical called			
		adenosine. Adenosine normally depresses neuron firing in many areas			
		of the brain. It apparently does this by inhibiting the release of			
		neurotransmitters, chemicals that carry nerve impulses from one neuron			
		to the next. Like many other agents that affect neuron firing, adenosine must first bind to specific receptors on neuronal membranes. There are			
		at least two classes of these receptors, which have been designated A1			
		and A2.Snyder et al propose that caffeine, which is structurally similar			
		to adenosine, is able to bind to both types of receptors, which prevents			
		adenosine from attaching there and allows the neurons to fire more			
		readily than they otherwise would.			
		1. What is known as the most widely used psychoactive substance on			
		Earth?			
		2. How does caffeine affect one's behaviour?			
		3. What are Neurotransmitters?			
		4. Write synonyms for stimulant.			
		5. Find a suitable word to replace the highlighted word – "Adenosine			
		normally <b>depresses</b> neuron firing in many areas of the brain.			
		OR			
11.	<b>a</b> ).	Analyze and develop an essay on "Artificial Intelligence influence on	5	4	5
		Human thought".			
	<b>b</b> ).	Simplify (Précis) the following paragraph.	5	4	5
		"Women entrepreneurs in the developing world often face challenges			
		that limit their chances for success and growth. They often have less			

access to education than men and have difficulty getting financing on their own. But with an understanding of the essential aspects of doing business – such as planning, financing, networking and marketing – they can overcome those obstacles. That's where the 10,000 Women Initiative comes in. As Faiza Elmasry tells us, it's an investment in education with dividends that benefit the businesswomen, their local communities, and their national economies." (Goldman Sachs invests in Educating Women in Business, Voice of America, voanews.com)

	I B.Tech. I Semester MODEL QUESTION PAPER					
		LINEAR ALGEBRA AND CALCULUS				
		Common to all Programmes of Engineering				
Tim	e: 3 F	Irs.	Iax. N	Iarks:	<b>70</b> M	
		Answer Question No.1 compulsorily				
		Answer ONE Question from EACH UNIT				
		Assume suitable data if necessary				
			10 x 2	=20N	<b>Iark</b> s	
			CO	KL	M	
1.	(a)	State Cauchy-Binet formula.	1	1	2	
	(b)	Discuss the conditions for testing the consistency of a system of non-	1	2	2	
	(D)	homogeneous linear equations.	1	2	2	
	(c)	State Cayley-Hamilton theorem.	2	1	2	
	(d)	Find the index and signature of the quadratic form $x^2 + 2y^2 - 3z^2$	2	3	2	
	(e)	State Lagrange's Mean-Value theorem	3	1	2	
	<b>(f)</b>	Verify Cauchy Mean-Value theorem for $f(x) = e^x \text{ in } (a, b)$	3	3	2	
	(g)	Explain Leibnitz's rule for differentiation under integral sign	4	2	2	
	(h)	Find $\frac{du}{dt}$ , if $u = y^2 - 4ax$ , $x = at^2$ , $y = 2at$	4	3	2	
	(i)	Express $\iiint_R f(x,y,z) dx dy dz$ in spherical polar co-ordinates	5	2	2	
	(j)	Evaluate $\int_{0}^{2} \int_{0}^{4} (x^2 + y^2) dx dy$	5	3	2	
			5 x 10	= 50 N		
		UNIT-1				
2.	(a)	Determine the rank of the matrix $\begin{pmatrix} 2 & 3 & -1 & -1 \\ 1 & -1 & -2 & -4 \\ 3 & 1 & 3 & -2 \\ 6 & 3 & 0 & -7 \end{pmatrix}.$	1	3	5	
	<b>(b)</b>	Find whether the following equations are consistent. If so, solve them $x + y + 2z = 4$ , $2x - y + 3z = 9$ , $3x - y - z = 2$	1	3	5	
		OR				
3.	(a)	Using Gauss-Jordan method, find the inverse of the matrix $\begin{pmatrix} 3 & 1 & 1 \\ 2 & 2 & 1 \\ 1 & 4 & 5 \end{pmatrix}$	1	3	5	

	(b)	Solve the equations $20x + y - 2z = 17$ , $3x + 20y - z = -18$ and $2x - 3y + 20z = 25$ by Gauss-Seidel iteration method.	1	3	5
		UNIT-2			
4.	(a)	Find the characteristic equation of the matrix $A = \begin{pmatrix} 2 & 1 & 1 \\ 0 & 1 & 0 \\ 1 & 1 & 2 \end{pmatrix}$ and hence compute $A^{-1}$ . Also find the matrix represented by $A^{8} - 5A^{7} + 7A^{6} - 3A^{5} + A^{4} - 5A^{3} + 8A^{2} - 2A + I$	2	3	10
		OR			
5.		Reduce $6x^2 + 3y^2 + 3z^2 - 4xy - 2yz + 4xz$ to sum of squares by linear transformation and hence find the matrix of the transformation.	2	3	10
		UNIT-3			
		Verify Rolle's theorem for $\frac{\sin x}{s^x}$ in $(0,\pi)$	_	2	_
6.	(a)		3	3	5
	<b>(b)</b>	Expand $f(x) = \cos x$ by Maclaurin's theorem with Lagrange's form of remainder.	3	3	5
		OR			
7.	(a)	Using Taylor's theorem, prove that $x - \frac{x^3}{6} < \sin x < x - \frac{x^3}{6} + \frac{x^5}{120}$ , for $x > 0$	3	3	5
	(b)	Find the appropriate value of cused in Cauchy's Mean-Value theorem for $f(x) = \ln x$ in [1, e]	3	3	5
		TINTE A			
		UNIT-4			
8.	(a)	If $\log u = \frac{x^3 + y^3}{3x + 4y}$ , find the value of $x \frac{\partial u}{\partial x} + y \frac{\partial u}{\partial y}$	4	3	5
	(b)	If $u = x + 3y^2 - z^3$ , $v = 4x^2yz$ , $w = 2z^2 - xy$ , evaluate $\frac{\partial(u, v, w)}{\partial(x, y, z)}$ at $(1, -1, 0)$	4	3	5
		OR			
9.	(a)	Expand $x^2y+3y-2$ in powers of $(x-1)$ and $(y+2)$ using Taylor's theorem.	4	3	5
	(b)	Discuss the maxima and minima of $f(x, y) = x^3 y^2 (1 - x - y)$	4	3	5
		UNIT-5			

10.	(a)	Evaluate $\iint xy  dx  dy$ over the positive quadrant of the circle $x^2 + y^2 = a^2$ by changing it in to polar coordinates	5	3	5
	<b>(b)</b>	Evaluate $\int_0^\infty \int_0^x xe^{\frac{-x^2}{y}} dxdy$ by changing the order of integration	5	3	5
		OR			
11.		Find the volume of the sphere $x^2 + y^2 + z^2 = a^2$ by using triple integral.	5	3	10

	<b>b</b> ).	Explain briefly how dissolved oxygen found in water by Winkler's method?	2	3	5
		UNIT-3			
6.	a).	Classify the composites based on reinforcement, briefly discuss the fiber reinforced composites?	3	3	5
	<b>b</b> ).	What are the properties of refractories and why it is necessary to understand their properties?	3	3	5
		OR			
7.	a).	Explain Flash point and Fire point with its significance?	3	3	5
	<b>b</b> ).	Mention the main ingredients of Portland cement and briefly explain its manufacturing?	3	3	5
		UNIT-4			
8.	a).	Write name of monomers of the following polymers and classify them as addition or condensation polymers- Bakelite, Styrene?	4	3	5
	<b>b</b> ).	Explain briefly how can we prepare PVC by the mechanism of Chain growth polymerization?	4	3	5
		OR _			
9.	a).	Define calorific value. Explain Higher & Lower calorific value in detail?	4	3	5
	<b>b</b> ).	How to calculate % of C, H and S through Ultimate analysis and write their significance?	4	3	5
		UNIT-5			
10.	a).	What are colloids? Explain their synthesis by Bragg's method?	5	3	5
	<b>b</b> ).	Briefly explain the Carbon nanotubes with properties and applications?	5	3	5
		OR			
11.	a).	How Nano materials can be prepared by Chemical precipitation method?	5	3	5
	<b>b</b> ).	What is the role of stabilizing agents for the stabilization of Nano materials?	5	3	5

		All questions carry equal Marks			
		Assume suitable data if necessary			
		UNIT-I	CO	KL	M
1		Construct a parabola when the distance of the focus from directrix is 50mm. Also draw the tangent and normal at any point on the curve.	1	3	14
		OR			
2		A circle of 50mm diameter rolls along a straight line without slipping. Draw the curve traced out by a point P on the circumference, for one complete revolution of the circle. Draw a tangent and normal at any point on the curve.	1	3	14
		UNIT-II			
3	a.	Draw the projections of the following points on the same ground line, keeping the projectors 25mm apart. (i) Point A in the HP and lying 20mmbehind the VP; (ii) Point B is 40mm above the HP and 25mm in front of the VP; (iii) Point C is 25mm below the HP and 25mm behind the VP; (iv) Point D is 15mm above the HP and 50mm behind the VP.	2	3	7
	b.	The front view of a line, inclined at 30° to the V.P is 65mm long. Draw the projections of a line when it is parallel to and 40mm above the H.P, its one end being 30mm in front of the V.P.	2	3	7
		OR			
4		A line AB, of 80 mm long has its end A, 15 mm in front of VP and 20mm above HP. The other end B is 40mm above HP and 50mm in front of VP. Draw the projections of the line and determine the inclinations of the line with HP and VP.	2	3	14
		UNIT-III			
5		Draw the projections of a regular hexagon of 25mm side, having one of its sides in the H.P and inclined at 60 <sup>0</sup> to the V.P, and its surface making an angle of 45 <sup>0</sup> with the H.P.	3	3	14
		OR			
6		Draw the projections of a regular pentagon of 40mm side, having its	3	3	14

	surface inclined at 30° to the H.P and side parallel to the H.P and inclined			
	at an angle of $60^{0}$ to the V.P.			
	UNIT-IV			
	A hexagonal pyramid, base 25mm side and axis 50mm long, has an edge			
7	of its base on the ground. Its axis is inclined at 30° to the ground and	4	3	14
	parallel to the VP. Draw its projections.			
	OR			
	Draw the projections of a pentagonal prism, base 25mm side and axis			
8	50mm long, resting on one of its rectangular faces on the H.P, with the	4	3	14
	axis inclined at 45 <sup>0</sup> to the V.P.			
	UNIT-V			
	A square pyramid, base 40mm side and axis 65mm long, has its base on			
	the H.P and all the edges of the base equally inclined to the V.P. It is cut			
9	by a section plane, perpendicular to the V.P, inclined at 45 <sup>0</sup> to the H.P and	5	3	14
	bisecting the axis. Draw the sectional top view and true shape of the			
	section.			
	OR			
	Draw the isometric projection of a cylinder of base diameter 30mm and			
10	axis height 60mm when axis is	5	3	14
	a) Horizontal and b) Vertical.

3.	Two identical rollers, each weighting $Q=100~N$ are supported by an inclined plane and a vertical wall as shown in Fig. 2. Applying conditions of equilibrium, determine the reactions at points of support A, B and C. Assuming the surfaces are smooth.	1	3	10
	UNIT-2			
4.	Determine the centroid of hatched region as shown in Fig. 3. (All dimensions are in cm.).  40 100 40 100 100 100 100 100 100 100 10	2	3	10
	OR			
5.	Determine the Moment of Inertia about its centroidal axes of the composite area shown below in Fig. 4. (All dimensions are in mm).	2	3	10

	Fig. 4  Fig. 4  100  Fig. 4			
6.	A block weighing 150 N is resting on another block B of weight 250 N and tied to the wall by a rope as shown in Fig. 5. The block B is resting on horizontal floor. The static friction between blocks A and B is 0.2 and between block B and floor is 0.25. A force P whose inclination with horizontal is 30°, is applied to block B such that motion impends. Find the magnitude of forces P and tension in the rope.    A   P   30°	3	3	10

		$R_{A}$ $3m$ $R_{B}$			
		UNIT-4			
8.	a).	A stone dropped into a well and is heard to strike the water after 4 seconds. Determine the depth of the well, if velocity of the sound is 350 m/s.	4	3	5
		A particle starting from rest, moves in a straight line, whose equation of			
	<b>b</b> ).	motion is given by: $S = t^3 - 2t^2 + 3$ . Determine the velocity and	4	3	5
		acceleration of the particle after 5 seconds.			
		OR			
		Referring to Fig 7 below, find the acceleration of a falling weight P, if the coefficient of friction between the block Q and the horizontal plane on which it slides is $\mu$ . Neglect the inertia of the pulley and friction. Assume P=10kg, Q=12kg and $\mu$ =1/3.			
9.		P Fig. 7	4	3	10
		TINITO E			
		UNIT-5  A flywhael rotates with a constant retardation due to breaking. From t =			
10.		A flywheel rotates with a constant retardation due to breaking. From t = 0 to t = 10 seconds, it made 300 revolutions. At time t = 7.5 sec, its angular velocity was 40 π rad/sec. Determine  i) The value of constant retardation  ii) Total time taken to come to rest and	5	3	10
		iii) Total revolutions made till it comes to rest.			

	OR			
11.	A solid cylindrical pulley of mass 800 kg, having 0.8 m radius of gyration and 2 m diameter, is rotated by an electric motor, which exerts a uniform torque of 60 kN-m. A body of mass 3 tons is to be lifted by a wire wrapped round the pulley.  Determine  i) Acceleration of the body and  ii) Tension in the rope.	5	3	10

			CO	KL	M
1.	a). b). c). d).	Find the output of the following code:  #include <stdio.h> int main(void) {     int i = 1, j = 0, k;     k = (i &amp; j) + (i   j) + (i ^ j) + !i + j;     printf("%d", k);     return 0; }  Differentiate pre and post increment with an example.  Show an example for continue statement in a loop.  Give an example for event-controlled loop.</stdio.h>	1 1 2 2	3 2 2	2 2 2 2
	e).	Write a code snippet to print alternate elements of a one-dimensional array of n integers.	3	2	2
	<b>f</b> ).	Apply nested loops and write a code snippet to find the sum of all elements of a two-dimensional array of size n x m.	3	3	2
	<b>g</b> ).	State the disadvantages of pointers.	4	1	2
	h).	Identify the operations are not allowed on pointers?	4	2	2
	i).	Write a macro to find the largest of two numbers. Use conditional operator.	5	3	2
	<b>j</b> ).	Find the output of the following code:	5	3	2

```
#include <stdio.h>
int main(void) {
    FILE *f = fopen("file","w");
    int i;
    fputs("12A",f);
    fclose(f);
    f = fopen("file","r");
    fscanf(f,"%d",&i);
    fclose(f);
    printf("%d",i);
    return 0;
}

		UNIT-1	CO	KL	M
2.	a).	Draw a flow chart to find the largest of three numbers.	1	3	5
	<b>b</b> ).	Explain operator precedence and associativity with two examples.	1	3	5
		OR			
3.	a).	List all the bitwise operators and give one example for each with numerical values represented in binary.	1	3	5
	<b>b</b> ).	Write a C program to calculate simple and compound interest. Given the term in months.	1	3	5
		UNIT-2 EDING COLLEGE			
4.	a).	Differentiate while and do-while loops with an example for each.	2	3	5
	b).	Write a C program to check if the given number is prime or not. Use for loop.	2	3	5
		OR			
5.	a).	Write a C program to find the sum of individual digits of a given integer number.	2	3	5
	b).	Use switch case to find the grade of a student given the marks. Show five grades. A, B, C, D, E and F for fail. If the marks are less than 40 then the grade is fail.	2	3	5
		A DATE O			
		UNIT-3		_	
6.	a).	Write a C program to sort the given array using bubble sort.	3	3	5
	<b>b</b> ).	List any five string handling functions and show its usage.	3	2	5
		OR			
7.	a).	Write a C program to implement string concatenation of two strings str1 and str2, store the result in str3. (Do not use string function)	3	3	5
	<b>b</b> ).	Develop C program to find the transpose of a matrix.	3	3	5

		UNIT-4			
8.	a).	Explain about structures and pointers. How can you access elements of a structure using its pointer notation. Discuss with an example.	4	3	5
	<b>b</b> ).	Differentiate structures and unions.	4	2	5
		OR			
9.	a).	Apply bit fields and write a C program to demonstrate its use.	4	3	5
	<b>b</b> ).	Write a C program to copy one structure variable to another structure of the same type	4	3	5
		UNIT-5			
10.	a).	Differentiate malloc and calloc with an example program.	5	3	5
	<b>b</b> ).	Explain the storage classes in C.	5	2	5
		OR			
11.	a).	Write a C program to copy the contents of file1 to file2.	5	3	5
	<b>b</b> ).	Discuss the random file access functions in C.	5	2	5
