About Workshop

Effective communication at workplace is vital for the smooth functioning of the institution and promoting its reputation. By learning English, one can develop one's communication skills and general language competency at large which in turn build confidence and increase awareness. Also, it enables one to become multi-tasked and a better performer. Up skilling is essential not only for teaching faculty but also for administrative and non-teaching staff who contribute to the growth of the institution. Keeping this in view the workshop “Communication Skills at Workplace for Non-teaching Faculty” aims to provide training on the linguistic abilities and workplace etiquette so that one can realize one's highest potential in the respective area of work.
