## RESOLUTIONS FOR THE MEETING DATED 19-09-2021

- (1) Resol: Discussed about Feedbacks from students, Alumni, Employers and Parents on Curriculum while Designing the Course structure and Syllabus for 3/4 B.Tech & 2/4 B.Tech Mechanical Engineering Program.

### Feedback Analysis 2020-21

A feedback on the curriculum is obtained from students, employers, faculty and alumni. After study of the feedback form various stake holders some important points of the feedback are identified. Total 308 feedback forms have been obtained from various stake holders.

The following are the key points obtained from the study of the feedback:

1. Strong research groups needed to be formed within the department in time with the present industrial needs
2. Students should be trained to explore and understand emerging technologies
3. All round development of the interpersonal and communicational skills to be encouraged
4. Students are to be provided with academic flexibility to give a wide spectrum of multi-disciplinary exposure
5. The curriculum also needs to include subjects like moral ethics and responsibilities which are much needed for present generation
6. More hands-on experience to be provided to students to link theory with practice
7. According to the competence outside we can increase the depth of the syllabus. It may load the students but increases the standards
8. Better to decrease quantity and increase quality
9. Better to include a mini project in 3<sup>rd</sup> year
10. Give priority to sports
11. Can add python language in first year
12. Introduce software courses in every semester
13. Industrial tours are required
14. Put more programming courses as elective subjects
15. Include new technologies in the syllabus
16. Library stock should be increased
17. Mechanical engineering related excellency centres must be established

3. Suggestions from experts:

(i) The University nominees from JNTUK, Kakinada; IIT, Hyderabad; Andhra University, Visakhapatnam and all the Subject experts expressed their satisfaction with the Syllabi.

(ii) Some important recommendations/suggestions given by the experts are:

- (a) Prof. Deekshitulu, categorically mentioned that, for any B.Tech program, 21 credits should be allotted for Basic Science Courses, of which 12 credits should be earmarked for Mathematics Courses. Then only the students get necessary knowledge of Mathematics for pursuing a B.Tech degree.
- (b) Prof. C.S. Sastri also supported Prof. Deekshitulu regarding the credits to be offered for the basic Science Courses and in particular for Mathematics. Both the Professors reiterated about the introduction of minor program in Mathematics for the engineering students as well as offering advanced/application oriented Courses in Mathematics as electives.
- (c) Prof. Byrangi Reddy expressed the feeling that Courses like Environmental Science, presently offered as mandatory Courses, be also allotted some credits so that the students learn the Courses with more attention.

| <p>The course is designed to train students in receptive as well as productive skills by incorporating a comprehensive, coherent and integrated approach that improves the learners' ability to effectively use English language in academic/ workplace contexts. The shift is from <i>learning about the language</i> to <i>using the language</i>. On successful completion of the compulsory English language course/s in B.Tech., learners would be confident of appearing for international language qualification/proficiency tests such as GRE, GMAT, IELTS, TOEFL and BEC besides being able to handle the writing tasks and verbal ability components of campus placement tests. Activity based teaching-learning methods would be adopted to ensure that learners would engage in actual use of language both in the classroom and laboratory sessions.</p> |  |   |    |    |   |     |     |      |
